

Industrial Math

12 Hours

Basic Industrial Math is a course designed to introduce students to several ways that math is applied in the manufacturing industry. Industrial math is used to define size, location, and distance in the "world of production." Even the slightest miscalculation can lead to missing a production deadline. Today's manufacturing industry requires a solid understanding of how basic math skills are crucial to obtaining production goals and delivery of quality product.

This course will cover the following topics:

- Whole numbers & Fractions
- Calculator use
- Decimal & Metric Equivalent Charts
- Conversion of Numbers
- Tolerance Methods & Interpretation
- Classes of Fits
- Basic Algebra
- Use of formulas
- Proportions, Ratios, and Percent

Classes will be held on Tuesdays & Thursdays from 5:00 p.m. to 9:00 p.m.
