

## PennDOT Safety Inspection Certification

This course will provide instruction for individuals seeking to become certified PA State Inspection Mechanics.

There are four categories of certification.

- Category #1 - Cars, light trucks under 17,000lbs & trailers under 10,000lbs
- Category #2 - Motorcycles
- Category #3 - Trucks & buses over 17,000lbs & trailers over 10,000lbs
- Category #4 - Enhanced Inspection/Document reviewer
  - Note: Category #4 testing will be administered without preparation from Jeff Tech.

All category testing is available at each session.

All individuals must be at least 18 years of age and have a valid driver's license for each class of vehicle they intend to inspect, each night of class. A certificate will be issued to the student by the PA Department of Transportation approximately 4-6 weeks after all components of the course are successfully completed.

Any individual who holds an out-of-state drivers license will need to contact PennDOT at 717-787-2895 prior to the start of class to be issued a "PA number" to be used on their 409 form.

Students should be aware that while every effort will be made to assist them in learning the skills needed to be a proficient inspector, a basic understanding of mechanics and vehicle repair is assumed upon registration. Novice students may struggle and may not be successful during their first attempt without this background.

It is recommended that students become familiar with course content prior to the start of class. See corresponding links below to the PennDOT website.
